Dear [Redacted]

STAT

I want to express my appreciation to you for the loan of your timebase corrector to the FBIS Television Center when its counterpart failed in September. Your prompt response to our request enabled us to continue production of our weekly "Executive News Summary" and other projects over the past three months.

This is a positive example of sharing expensive and scarce resources among Agency television components, for which we extend a special thank you.

Sincerely,

[Redacted Signature]
